Sheets:

Table S1a Chemical composition of pooled soil samples at central field trials ($\text{Li}_2\text{B}_4\text{O}_7$ fusion).

Table S1b Loss on ignition corrected chemical composition of pooled soil samples at central field trials ($\text{Li}_2\text{B}_4\text{O}_7$ fusion).

Table S2a Chemical composition of pooled soil samples at central field trials (microwave digestion).

Table S2b Loss on ignition corrected chemical composition and magnesium and strontium isotope composition of pooled soil samples at central field trials (microwave digestion).

Table S3 Soil pH of pooled soil samples at central field trials.

Table S4 Chemical and magnesium and strontium isotope composition of the exchangeable fraction (1M NH_4OAc) of pooled soil samples at central field trials.

Table S5 Chemical and magnesium and strontium isotope composition of plant samples at central field trials.

Metric	Units	Sheet	Description
X	(wt%, $\mu\text{g/g}$, pg/g)		Oxide and element concentrations in bulk soil, exchangeable fractions and plant samples
$\delta^{26}\text{Mg}$, $\delta^{25}\text{Mg}$	(‰)		Magnesium isotope ratios expressed as delta values
$^{87}\text{Sr}/^{86}\text{Sr}$			Radiogenic strontium isotope ratio
LOI	(%)		Loss on ignition
soil pH			pH of bulk soil

Table S1a Chemical composition of pooled soil samples at central field trials ($\text{Li}_2\text{B}_4\text{O}_7$ fusion).

Elements measured by ICP-OES: K, Ca, Mg, P, Fe, Mn, Zn, Na, Al, Co. Elements measured by ICP-MS: Cu, B, Ba, Sr, Ti, Cr, Li. (a)-(g) = full digestion replicates; (1)-(18) = Bracketing standard passed through cation-exchange chromatographic method v

* calculated following Young and Galy (2004); ** isotope data taken from GeoReM (<http://georem.mpch-mainz.gwdg.de> (accessed 22 January 2021)); *** $\delta^{26}\text{Mg}$ from Wang et al. (2020); **** from Vogl et al. (2020).

* calculated following Young and Galy (2004); ** isotope data taken from GeoReM (<http://georem.mpcn-mainz.gwdg.de> (accessed 22. January 2021)); *** $\delta^{27}\text{Mg}$ from Wang et al. (2020); **** from Vogl et al. (2020). n.r. = not reported; n.d. = not determined; <LOQ = below limit of quantification; 2SD: two-fold standard deviation; 2SE: two-fold standard error, n: number of Mg isotope mass spectrometry analyses.
